Forward-Looking Statements

This presentation contains "forward-looking statements" within the meaning of the securities laws. All statements, other than statements of historical fact, included in this presentation that address activities, events, or developments that Black Stone Minerals, L.P. ("Black Stone Minerals," "Black Stone," "the Partnership," or "BSM") expects, believes, or anticipates will or may occur in the future are forward-looking statements. The words "believe," "expect," "may," "estimates," "will," "anticipate," "plan," "intend," "foresee," "should," "would," "could," or other similar expressions are intended to identify forward-looking statements, which are generally not historical in nature. However, the absence of these words does not mean that the statements are not forward-looking.

These statements are based on certain assumptions made by Black Stone Minerals based on management's expectations and perception of historical trends, current conditions, anticipated future developments, and other factors believed to be appropriate. Although Black Stone Minerals believes that these assumptions were reasonable when made, because assumptions are inherently subject to significant uncertainties and contingencies, which are difficult or impossible to predict and are beyond its control, Black Stone Minerals cannot give assurance that it will achieve or accomplish these expectations, beliefs, or intentions. Such statements are subject to a number of assumptions, risks, and uncertainties, many of which are beyond the control of Black Stone Minerals, which may cause actual results to differ materially from those implied or expressed by the forward-looking statements. These include the factors discussed or referenced in the "Risk Factors" and "Forward-Looking Statements" sections of the filings Black Stone Minerals has made with the Securities and Exchange Commission, including its annual report on Form 10-K and quarterly reports on Form 10-O, as well as risks relating to financial performance and results, current economic conditions and resulting capital restraints, prices and demand for oil and natural gas, availability of drilling equipment and personnel, availability of sufficient capital to execute our business plan, impact of compliance with legislation and regulations, successful results from our operators' identified drilling locations, our operators' ability to efficiently develop and exploit the current reserves on our properties, our ability to acquire additional mineral interests, and other important factors that could cause actual results to differ materially from those projected. When considering the forward-looking statements, you should keep in mind the risk factors and other cautionary statements in filings Black Stone Minerals has made with the SEC.

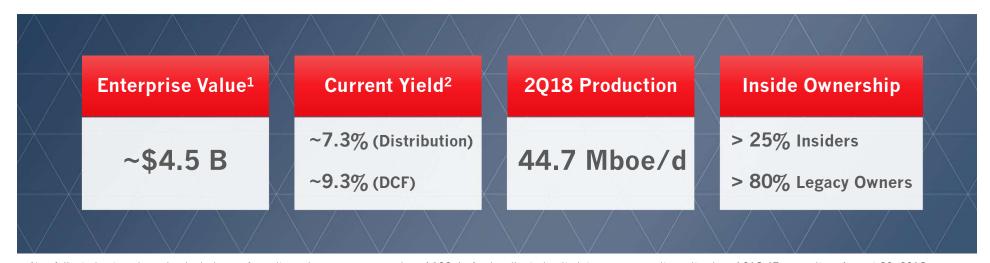

You are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date on which such statement is made, and Black Stone Minerals undertakes no obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by applicable law. All forward-looking statements attributable to Black Stone Minerals are qualified in their entirety by this cautionary statement.

Black Stone Minerals at a Glance

BSM LISTED NYSE

- A Black Stone Minerals, L.P. is the largest pureplay oil and gas mineral and royalty owner in the United States
- Over 20 million mineral and royalty acres with interests in 41 states and 64 producing basins

¹⁾ Adjusted enterprise value includes pref. equity and assumes conversion of 100% of subordinated units into common units; unit price of \$18.47 per unit on August 30, 2018 per unit of \$0.431 (see recognitiation and calculation in Appendix):

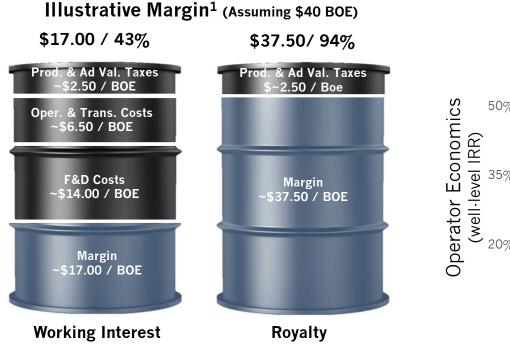

2) Distribution yield assumes the common MQD for 2Q18 of \$0.3375 and DCF yield assumes DCF per unit of \$0.431 (see reconciliation and calculation in Appendix); respective yields calculated using a unit price of \$18.52 on August 31, 2018

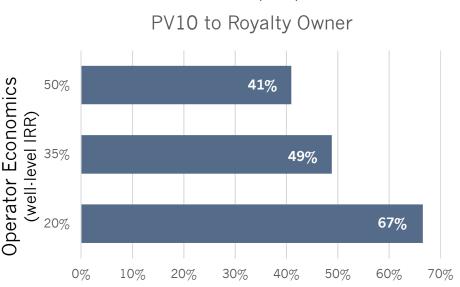

Benefits of Mineral Ownership

- Oil and gas exposure with no operating cost or capital spending requirements
- Direct benefit from technology advances to enhance recovery and well economics
- Represents perpetual call option on future oil & gas development activity
- Scale facilitates opportunities to partner with operators to initiate or accelerate drilling

Comparative Well Economics

Returns (IRR)²

2) Illustrative well economics assuming 20% royalty; excluding royalty acquisition costs and operator leasing costs.

¹⁾ Illustrative only. Working interest economics based on 2018 average costs of selected upstream companies; F&D costs based on 5-year average ended 2017.

The Black Stone Business Model

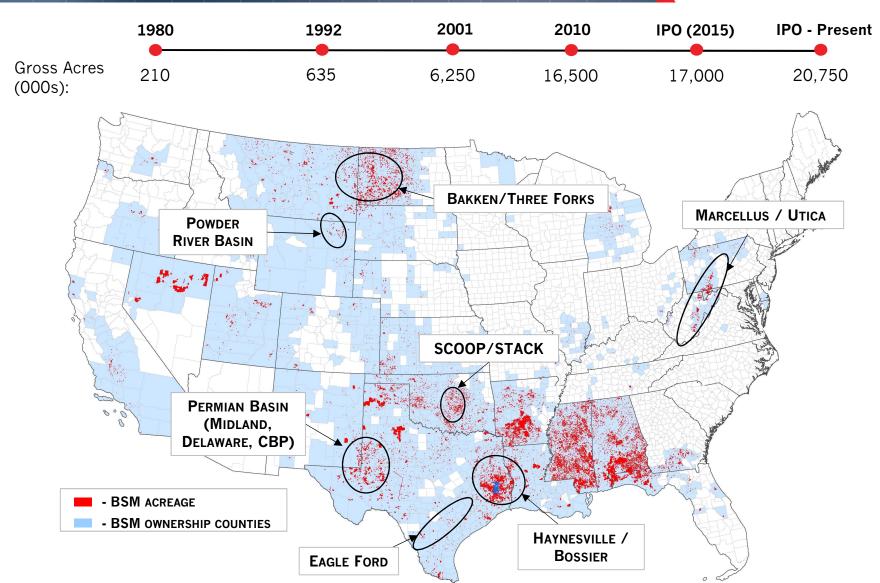

- Continue to enhance scale with an emphasis on building up core positions
- 2 Unlock value of acquired properties through inhouse Land, Engineering and Geology groups
- Maintain low leverage levels and ample liquidity to capitalize on acquisition opportunities

Acquisitions Over Time

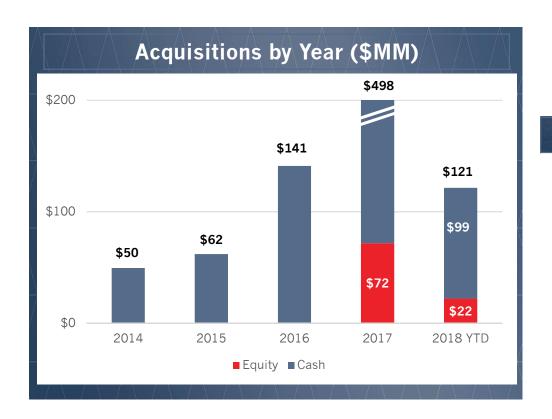

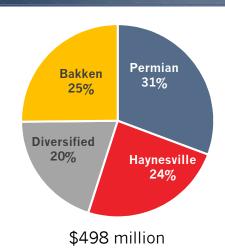

Recent Acquisition History

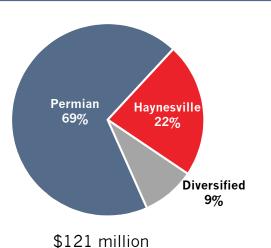

Black Stone has added to its core positions while opportunistically pursuing large, diversified mineral packages

2017 Acquisition Profile

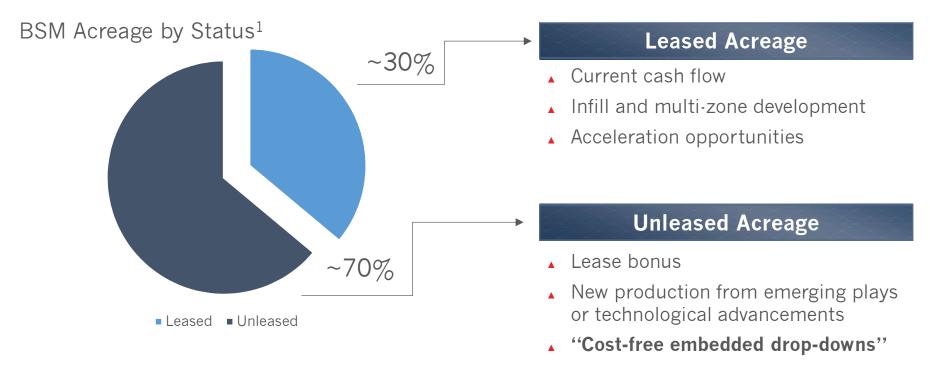

2018 YTD Acquisition Profile

Active Management

- ▲ 20 million acres of opportunity leads to organic growth with <u>no</u> incremental capital requirements
 - ▲ Black Stone's team of landmen, engineers and geologists actively promote its acreage to industry operators

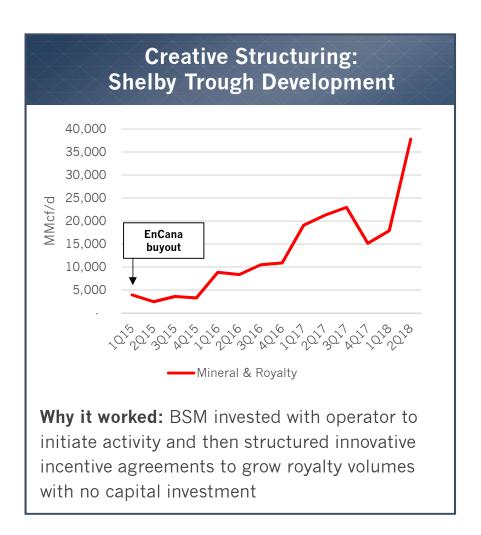

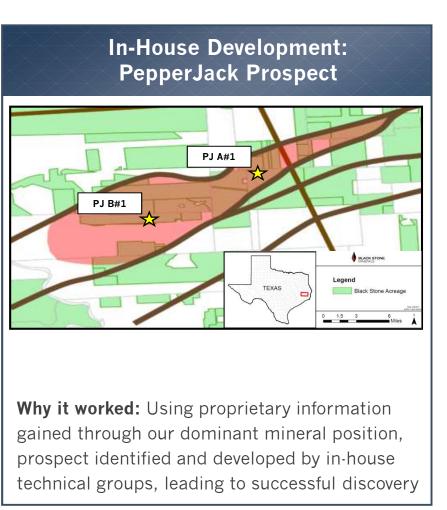

¹⁾ Based on gross acres for all interest types

Active Management Examples

▲ Black Stone's high 'net' mineral positions present a strategic advantage to promote and accelerate development

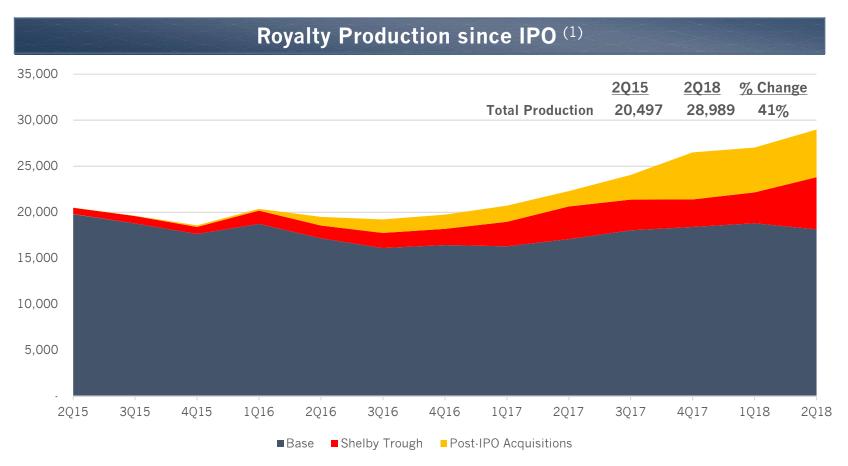

Active Management Matters

▲ By actively managing the asset base, Black Stone was able to maintain royalty volumes through an industry downturn and then accelerate production during recovery

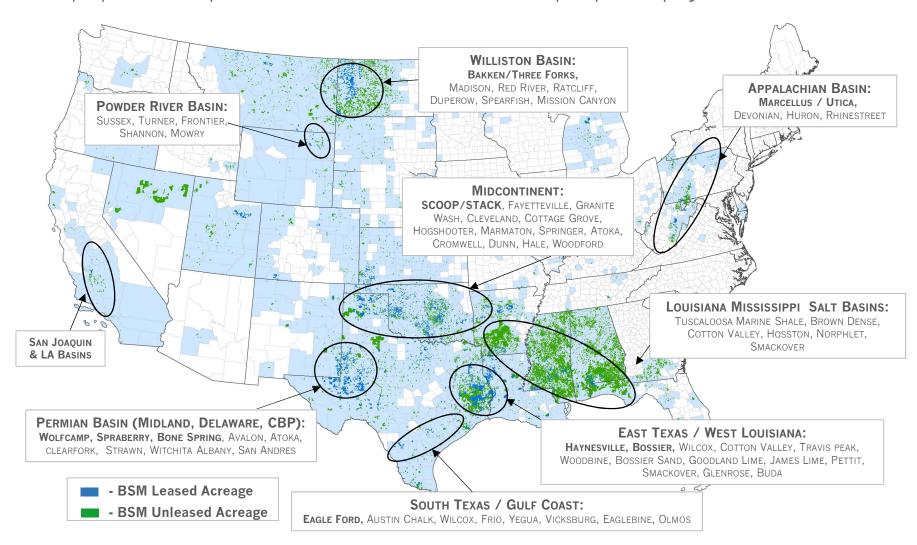

¹⁾ Production through 4Q17 is shown is on a production-month activity basis; production for 2018 represents BSM production estimates due to lag in payments from operators

Active Management: Opportunities

▲ Black Stone has leading positions in several of today's most active resource plays, as well as a perpetual call option across the lower 48 in dozens of prospective plays

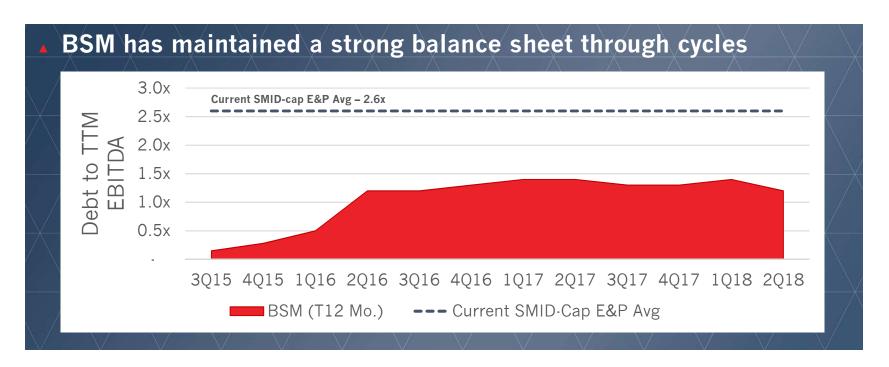

Maintaining Balance Sheet Strength

Strategy: Maximize financing flexibility for new acquisition opportunities

▲ Funding sources

- Public markets Approx. \$42 million issued through ATM since through 2Q18
- ▲ Private capital \$300 million convertible preferred issued in November 2017
- Equity issued directly to sellers Since beginning of 2017, approx. \$88 million issued to date
- ▲ Credit facility availability BSM regularly maintains \$100 to \$200 million of dry powder

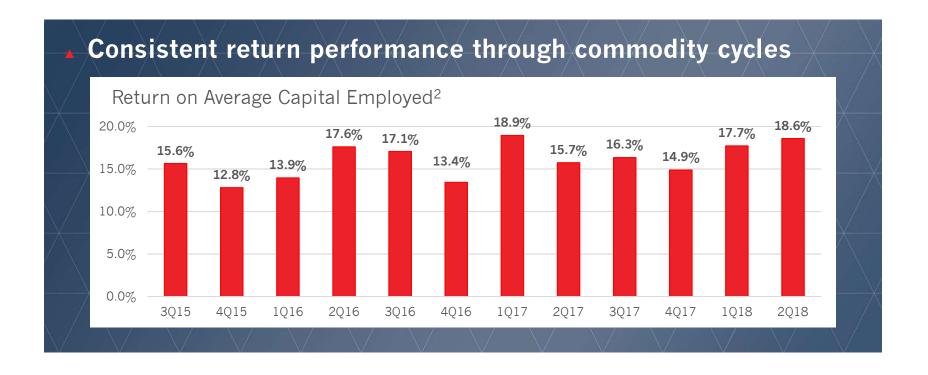

Generating Returns

▲ Long history of returning cash to equity holders

- >7% cash yield supported by growing free cash flows
- >\$3 billion returned to investors through distributions over the past 20 years
- >3x return on invested capital to date¹

Return on Investment (ROI) calculated as (Cumulative Distributions + Adj. BSM Market Cap) / Capital Raised through August 30, 2018
 ROACE calculated as the annualized quotient of quarterly EBIT (Adjusted EBITDA plus DD&A) divided by average capital employed during the period; capital employed is defined as the sum of long-term debt, preferred equity, and equity as reported on consolidated quarterly balance sheets

Second Quarter 2018 Highlights

		2Q17	2Q18
Total Production (MBoe/d)	1~20%	37.3	44.7
Royalty Production (MBoe/d)	1~47%	21.2	31.1
Adjusted EBITDA (\$MM)	1~34%	\$75	\$100
Drilling Capital, net (\$MM)	1 ~72%	\$16	\$4
Common Distribution (\$ per unit annualized)	1~8%	\$1.25	\$1.35

Near Term Growth Drivers

Haynesville/Bossier

- Minerals position concentrated in Shelby Trough, which is delivering the best economics across the entire play
- Additional exposure across Texas and Louisiana
- Proximity to major natural gas hubs and export markets

Active Operators

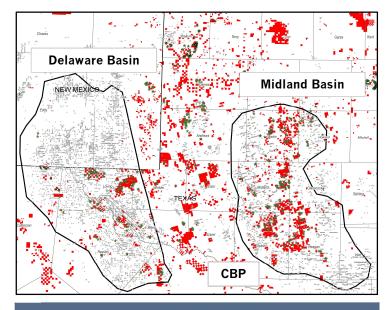

Permian

- ▲ Black Stone has ~62,000 net royalty acres in the core of the Midland and Delaware basins
- Significant position in the Central Basin Platform with exposure to emerging plays such as the horizontal San Andres

Active Operators

Key Messages

Investors gain exposure to industry-leading minerals portfolio with significant exposure to two of the most active areas in the United States

Upside exposure from increase in commodity prices, accelerated development, and future break-out plays across portfolio

Investors benefit from management team with substantial experience unlocking value from mineral-and-royalty assets

Appendix

Industry-Leading Diversified M&R Portfolio

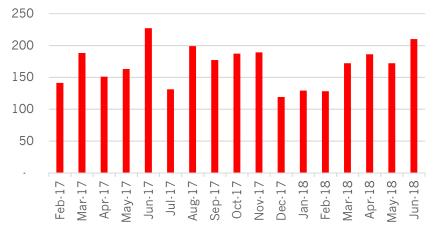

2Q18 Production by Play

- Black Stone benefits from the significant diversity of its asset base
 - BSM tracks activity at a play level for approximately 40 individual plays
 - Provides broad exposure to new discoveries and development activity
 - Acreage in every resource play, with large positions in several of the most active resource plays

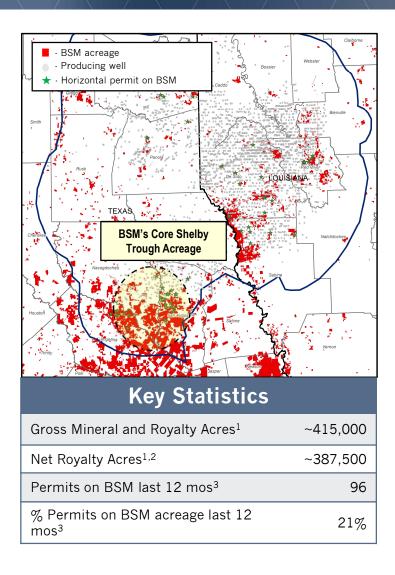

- ▲ Black Stone consistently sees meaningful permitting activity across its acreage position
 - ▲ Trailing 12-month permits filed as of June 30, 2018 stands at ~2,000 permits¹
 - Approximately 8% of all permits filed in the Lower 48 over the last 12 months have been on BSM acreage

Haynesville / Bossier Position

- 43 active horizontal rigs⁴ across the play, up ~260% from the 2016 low
- Improved completions and a favorable regional gas market have brought the Haynesville / Bossier into the top quartile of US oil and gas plays
- A Black Stone believes its Shelby Trough position in East Texas to be the best part of the Haynesville / Bossier play in terms of ultimate recoveries and economics
 - Recent results demonstrate EURs ranging from 2.5 3.0+ Bcf / 1,000' of lateral
 - Operators continue to improve and optimize completion designs
- BSM is also significantly exposed to the Louisiana Haynesville/Bossier

Active Operators

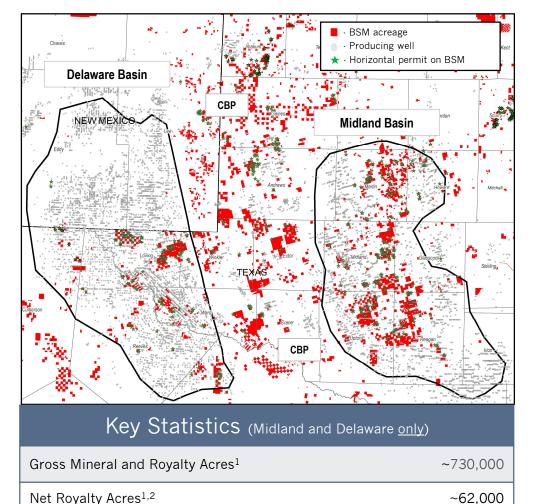

- 1) Includes only Haynesville acreage as of 8/16/18 and includes mineral interests, NPRIs, and ORRIs
- 2) A net royalty acre is defined as one surface acre leased at a 1/8th royalty
- 3) Permit data sourced from IHS and represents permits filed through 6/30/18; includes permits on Noble acreage
- 4) Per RSEG report dated 7/31/18, source data provided by RigData

Permian Position

- The Midland and Delaware are the two most active basins in North America with over 400 combined horizontal rigs⁴
- Black Stone has aggregated a significant position in these basins since the IPO to complement its legacy position
- Black Stone has also expanded its position in the Central Basin Platform ("CBP") with exposure to emerging plays such as the horizontal San Andres, Wichita / Albany, and Woodford plays

Active Operators

772

13%

1) As of 8/30/18, inclusive of mineral interests, NPRIs, and ORRIs

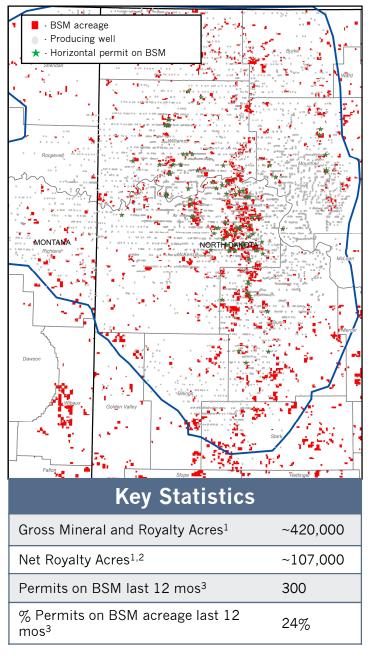

Permits on BSM last 12 mos³

% Permits on BSM acreage last 12 mos³

- 2) A net royalty acre is defined as one surface acre leased at a 1/8th royalty
- 3) Permit data sourced from IHS and represents permits filed through 6/30/18; includes permits on Noble acreage
- 4) Per RSEG report dated 7/31/18, source data provided by RigData

Bakken / Three Forks Position

- ▲ 52 active horizontal rigs⁴ across the play, up approximately ~140% from the 2016 low
- Production for the play is above prior peak and continuing to grow
- Black Stone's concentration in the core, attractive pricing differentials, and improved completion designs continue to drive strong Bakken/Three Forks performance

Active Operators

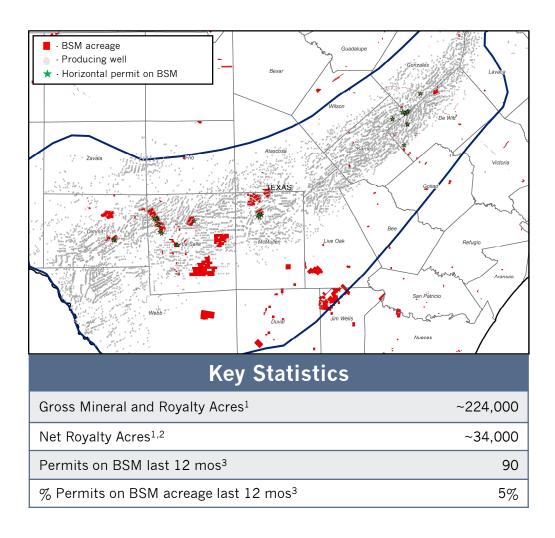

- Includes only Bakken acreage from 2017 10-K and includes mineral interests, NPRIs, and ORRIs
- 2) A net royalty acre is defined as one surface acre leased at a 1/8th royalty
-) Permit data sourced from IHS and represents permits filed through 6/30/18; includes permits on Noble acreage
- 4) Per RSEG report dated 7/31/18, source data provided by RigData

Eagle Ford Position

- 73 active horizontal rigs⁴ across the play, up over 200% from the 2016 low
- Year-to-date activity in play ahead of 2017 activity on BSM acreage
- BSM exposed to some of the best parts of the play

Active Operators

- 1) Per 2017 10-K and includes mineral interests, NPRIs, and ORRIs
- 2) A net royalty acre is defined as one surface acre leased at a 1/8th royalty
- 3) Permit data sourced from IHS and represents permits filed through 6/30/18; includes permits on Noble acreage
- 4) Per RSEG report dated 7/31/18, source data provided by RigData

Financial Summary

Current 2018 Guidance (Revised August 6, 2018)					
Average daily production (Mboe/d)	44.5 – 45.5				
Percentage natural gas	~71%				
Percentage royalty	~68%				
Lease bonus and other income (\$MM)	\$30 - \$40				
Lease operating expense (\$MM)	\$16 - \$18				
Production costs and ad valorem taxes (as % of oil & gas revenue)	11% - 13%				
Exploration expense	\$7.5 - \$8.5				
G&A – cash (\$MM)	\$45 - \$47				
G&A – non-cash (\$MM)	\$30 - \$32				
G&A – TOTAL (\$MM)	\$75 - \$79				
DD&A (\$/Boe)	\$7.00 - \$8.00				

Financial Position					
(\$ in millions)	As of 6/30/18 As of 8/3/				
Cash	\$7.1	\$18.9			
Borrowing base	\$600	\$600			
Borrowings under credit facility	421	395			
Remaining availability	179	205			
Liquidity	\$186.1	\$223.9			
Debt to TTM EBITDAX	1.2x				

Hedging Summary							
	Rem. 2018	2019	2020				
Oil volumes hedged (MBbl)	1,703	2,580	600				
Approximate % of production	72%						
Average price (\$/Bbl)	\$55.23	\$58.43	\$55.00 - \$65.75				
Gas volumes hedged (MMcf)	27,230	29,000					
Approximate % of production	73%						
Average price (\$/Bbl)	\$3.01	\$2.86					

Adjusted EBITDA and Distributable Cash Flow Reconciliation
